

ADSD HW2 Install Github/Tools

I have initial my github, and deploy to-do list on pythonanywhere.

Github repo: https://github.com/changcode/ADSD_TODO

 .vscode	update bootstrap	5 days ago
 static	"config static path in bottle"	3 days ago
 views	Update index and todo	2 days ago
 README.md	Update README.md	3 minutes ago
 app.py	Update index.tpl and app.py file	3 days ago
 bottle_app.py	init	5 days ago
 todo.db	init	5 days ago
 v3.3.6.zip	init	5 days ago

 README.md

ADSD_TODO

This repo is ADSD class project, I use bottlepy web freame and Bootstrap front end frame try to build this basic frame. ToDo is a public tools to add/edit/update/delete items in this list.

This app is can be deployed on PythonAnywhere and local environemnt.

Try <http://changcode.pythonanywhere.com/>

The database I will use:

1. SQLite3
2. TinvDB

Pythonanywhere: <http://changcode.pythonanywhere.com/todo>

ToDo List

The open items are as follows:

Seq	Description	Marker
1	Read A-byte-of-python to get a good introduction into Python	0
2	Visit the Python website	1
3	Test various editors for and check the syntax highlighting	1
4	Choose your favorite WSGI-Framework	0
5	Show everyone how to use Git with this...	1
6	Dismiss the class	1

Local Environment:

I use PyCharm IDE to do development, it's awesome IDE in IntelliJ products.
